PROFILE

I am Front-End Developer with a strong foundation in web technologies and a deep understanding of user experience design. I am always eager to adopt new tools and technologies to create efficient, scalable, and user-friendly interfaces

EDUCATION

Bachelor's Degree in Computer Science And Artificial Intelligence   2020 – 2024
Grade: Very Good with GPA 3.36   Sohag, Egypt

PROJECTS

Weather App   09/2024 – 09/2024
a responsive weather application using Next.js and OpenWeatherMap API, implementing geolocation features and real-time weather data visualization with a modern UI/UX design.
- Repo ⧉
- Live Demo ⧉

Chat App   07/2024 – 08/2024
a real-time chat application using React, Redux, React-Query, Custom Hooks and Socket.io. Implemented features such as user authentication, real-time messaging, online user status, and message history, providing a seamless and interactive communication platform.
- Repo ⧉
- Video ⧉

E-Commerce For Clients   07/2024 – 07/2024
built with React, Redux, and Tailwind CSS. Features include user authentication, product browsing by category, shopping cart functionality, and responsive design for seamless user experience across devices.
- Repo ⧉
- Live Demo ⧉

E-Commerce Admin Dashboard   07/2024 – 07/2024
built with React, Redux Toolkit, and Tailwind CSS. Features include product management (add, edit, delete), responsive design, and integration with a backend API for real-time data handling.
- Repo ⧉
- Live Demo ⧉

Netflex Clone   09/2024 – 10/2024

A fully functional web application inspired by Netflix, developed using Next.js,
React, and MongoDB. Leveraged Server Actions with Zod validation and SSR
(Server-Side Rendering) for an optimized user experience and caching efficiency.
This project demonstrates a robust movie and TV show streaming platform with
features like user authentication, genre-based categorization, a responsive grid
system for content display, route protection with middleware, and utilizes MUI
for UI components.

- Repo ⊡
- Live Demo ⊡

Lava Landing Page   10/2024 – 10/2024

Developed a modern landing page using Next.js and Framer Motion,
incorporating smooth animations to enhance user engagement. Utilized
implemented responsive design principles for optimal viewing across various
devices.

- Repo ⊡
- Live Demo ⊡
